**Products**

Modular AC-DC and DC-DC power components, complete power systems, configurable and custom power solutions and accessories

Customers

The applications in which our products are used are in the higher-performance, higher-power segments of the power systems markets. Our products are sold worldwide to customers ranging from smaller, independent manufacturers of highly specialized electronic devices to original equipment manufacturers (OEMs) and their contract manufacturers. Industries served include aerospace and defense electronics, enterprise and high performance computing, industrial equipment and automation, telecommunications and network infrastructure, and vehicles and transportation markets.

Manufacturing

Power components are manufactured using highly automated processes in Vicor's ISO 9001:2008 registered facilities in Andover, MA.

Customer Support

Vicor's worldwide offices support our customers through our network of independent sales representative organizations in North America and in other areas of the world through international distributors. Field Applications Engineers, who are located in all of our offices, provide direct technical sales support by reviewing new applications and technical matters with existing and potential customers, while Vicor's Customer Service staff works to insure that each customer receives a rapid

and professional response for each business transaction.

Calibration

Computerized calibration system for Inspection, Measuring and Test Equipment, in accordance with ISO 9001: 2008, which includes National Institute of Standard and Technology (NIST) traceable documented calibration control standards. All calibrated instruments have labels attached indicating gage ID number, date of last calibration, calibration technician identification and next calibration due date.

Net Revenues for the years ended December 31 (000's):

2011	\$252,968
2010	\$250,733
2009	\$197,959
2008	\$205,368
2007	\$195,827
