

In view of Vicor's wish to maintain an environmentally conscious work place and as a result of the many enacted and emerging international environmental directives and regulations, Vicor has instituted a RoHS Program in accordance with QSP-0029. In keeping with Vicor's required due diligence efforts to ensure Vicor RoHS Compliant Product is, and in fact, remains RoHS Compliant, Vicor has instituted a Supplier Material RoHS Compliance Audit Program. This Audit Program is described in the following documents, and functions to conduct RoHS Audits on Supplier provided components received by Andover BBU and VI Chip BU, Picor and Westcor.

[DP-0237](#) – Vicor Supplier provided Material Audit Program.

[WI-0102](#) – Niton Analyzer XLt797 Operation.

WS-0009 - XRF Analyzer Inspection Criteria and Test Duration by Component Type.
